

LH201

21" Long Throw Horn

LH201 is a long throw horn speaker with 21" round flare, made from solid aluminium housing for a solid sound throw. It is suitable for outdoor installation with stainless steel fasteners and powder epoxy coated steel brackets.

Among suitable installations include warning system sounder for beaches, plants, shipyards, mosques and any other installations where long range of sound alerts are required.

Features

- Built-in matching **Audio Transformer**
- **IP65** rated, weatherproof with powder epoxy coated steel and SS fasteners.
- **2-Way connector** available for mounting dual driver with total of 200W 100V
- **Strontium Ferrite** magnet
- Optimised for **voice and siren** delivery

Technical Specifications

Power rating	100W 100V
Power taps	50 / 75 / 100W 100V line
Max power	120W 100V
Driver	Detachable driver with 1 3/8" thread
Primary impedance (Ohm)	200 / 133 / 100
Secondary impedance (Ohm)	16
SPL @ 1W / m (+/- 3 dB), 1 KHz	110 dB
Max SPL at rated power	130 dB
Body material	Aluminium
Bracket	Steel with powder epoxy coating
2-Way connector (optional)	Aluminium die cast
IP ratings	IP65
Min / Max ambient temperature	-20°C to 55°C
Overall size w bracket (WxHxD) mm	500 dia x 1100
Weight including driver (single driver)	8.4 kg
Colour	Off White
